

Formula text-layer test

This born-digital page mixes prose and six formulas (F1–F6) so we can see exactly what the embedded text layer stores for each.

F1 (quadratic formula):

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

F2 (Euler identity):

$$e^{i\pi} + 1 = 0$$

F3 (Pythagorean theorem):

$$a^2 + b^2 = c^2$$

F4 (Gaussian integral):

$$\int_0^\infty e^{-x^2} dx = \frac{\sqrt{\pi}}{2}$$

F5 (Basel problem):

$$\sum_{n=1}^{\infty} \frac{1}{n^2} = \frac{\pi^2}{6}$$

F6 (mass-energy equivalence):

$$E = mc^2$$
